Quiz Session 1

Program:

```
program gaji_pegawai;
uses crt;
var
gol, lembur : integer;
gaji, gaji_lembur, gaji_kotor : longint;
pajak, gaji_bersih : real;
begin
clrscr;
write('Masukkan Golongan Anda : '); readln(gol);
write('Masukkan Jam Lembur Anda : '); readln(lembur);
if (gol = 1) then gaji := 2500000
else if (gol = 2) then gaji := 3000000
else if (gol = 3) then gaji := 3500000
else begin
writeln('Golongan Anda tidak terdaftar');
exit();
end;
gaji_lembur := lembur * 50000;
gaji_kotor := gaji + gaji_lembur;
pajak := gaji_kotor * 0.05;
gaji_bersih := gaji_kotor - pajak;
writeln();
writeln('Total Pendapatan Anda ', gaji_kotor);
writeln('Pajak Penghasilan ', pajak:0:0);
writeln('Jumlah Gaji yang Anda Terima ', gaji_bersih:0:0);
end.
```

2. program

```
uses wincrt;  
var a, b, c: integer;  
begin  
  write('Masukkan nilai bil 1');  
  readln(a);  
  write('Masukkan nilai bil 2');  
  readln(b);  
  write('Masukkan nilai bil 3');  
  readln(c);  
  if (a>b) and (a>c) then writeln(a) else  
  if (b>a) and (b>c) then writeln(b) else  
  writeln(c);  
end.
```

Penjelasan, program untuk cek 3 bilangan mana yang paling besar.

3. Algoritma

1. Mulai
2. Inisialisasi variabel a, t, t_limas, vol dengan tipe data real (optional)
3. Masukkan nilai a
4. Masukkan nilai t
5. Masukkan nilai t_limas
6. Hitung volume = $\frac{1}{3} * \frac{1}{2} * a * t * t_limas$
7. Tampilkan volume
8. Selesai

Program

```
program vol_limas_segitiga;
uses crt;
var a, t, t_limas, vol : real;
begin
  clrscr;
  write('Alas Segitiga : '); readln(a);
  write('Tinggi Segitiga : '); readln(t);
  write('Tinggi Limas : '); readln(t_limas);
  vol := 1/3 * 1/2 * a * t * t_limas;
  writeln('Volume Limas Segitiga : ', vol:0:2);
end.
```

4. Program

```
uses crt;
begin
  writeln((65 and 34) shl 2);
end.
```

Hitung Manual

65 = 0100 0001

34 = 0010 0010

----- AND

0000 0000 = 0

0 SHL 2 = 0
